📊 Budgetary Control Dashboard

📌 Project Overview

This project presents a **Budgetary Control Plan Performance Dashboard** created in Microsoft Excel.
It helps in tracking and analyzing key financial metrics like **Revenue, Expenses, Profit, and Product Performance**.

🎯 Objective

- Monitor company financial performance
- Compare Revenue vs Expenses
- Analyze monthly and product-wise trends
- Support better decision-making

📷 Dashboard Preview

📁 Files Included

- 📄 dashboard.xlsx → Fully interactive Excel dashboard
- 🖼 dashboard.png → Dashboard preview image

📊 Key Features

🔹 Financial Analysis

- Revenue vs Expenses comparison
- Revenue vs Income insights

🔹 Product Insights

- Product-wise revenue breakdown

- Monthly revenue trends

🔹 **Expense Tracking**

- Category-wise expense analysis
- Administrative & operational cost tracking

🔹 **Interactive Filters**

- Quarter-wise filtering
- Month-wise filtering

🛠️ **Tools Used**

- Microsoft Excel
- Pivot Tables
- Charts (Bar, Line, Pie, Donut)
- Slicers & Dashboard Design

🚀 **How to Use**

1. Download the dashboard.xlsx file
2. Open in Microsoft Excel
3. Use filters (Quarter / Month) to explore data
4. Analyze insights using charts

📈 **Insights You Can Get**

- Which product generates highest revenue
- Monthly performance trends
- Expense distribution
- Profitability comparison
